CardioDiagnostics

Reinventing Cardiac Care

Powered by Talent. Driven by Innovation

Scrum Adoption
By Walaa El Kerdy

CardioDiagnostics is a medical technology company focused on tackling the leading cause of death around the world which is Heart Disease

We aspire to achieve this by leveraging **Big Data Analytics**, **Wearables** and **Medical-Grade Technologies.**

CardioDiagnostics Solutions

Leverage Existing Heart Monitors Around the World

**Build state-of-the-art technologies**

Make Saving Lives Easier

Nurse

Physician

How we were introduced to Agile

Orally introduced Agile BRIEFLY

Focused on the tools that were NOT user friendly

Challenges

⟫ Unclear Requirements

⟫ Miscommunication

⟫ Projects taking too long

⟫ No Visibility on the outcome

Frustration from both Technical and Business Teams

CardioDiagnostics

Power of Agile - Scrum

- Better understanding of features after involving the team in gathering requirements

- Planning and focusing on high-quality features instead of deadlines

- Achieving more in less time, even including refactoring and performance optimizations

- Delivering working product in two-weeks time instead of months

- Increase in team productivity and time management

CardioDiagnostics

Outcome

Happy Team

Happy Customers

CardioDiagnostics

Future Optimizations

Better Tracking

Work on the technical part to support the Agile methodology – like Test automation, DevOps

Continuous Improvement and Continuous Learning

CardioDiagnostics

Thank You!
